Multiflex

# MultiFlex

Convenient 10-meter LED strip on a slim reel – the perfect tool for any craftsman!

This high-power LED strip is the new generation of 230V LED strip packed on a slim and practical container.

## THIS IS MULTIFLEX

- Multiflexible lighting tool
- Brightness up to 700lm / m
- Connects directly to the socket
- 10 meter long LED strip
- Perfect when light is needed from several angles
- Made for tough, Nordic conditions
- Hang up and plug in where needed
- The roller is easy to hold and takes up minimal space
- Easy to handle, safe to use

## EXPERIENCE AND DEVELOPMENT

Promitto Group is a leader in the Nordic region and develops LED lighting for the construction industry.

We have been working with lighting for many years. We have learned that technology is constantly changing and that development is happening fast. That is why we are constantly developing our products and services.

The Nordic environment requires the best product quality to withstand both cold and harsh conditions, and MultiFlex will make the work easier and safer for those who use it – therefore we focus on the details.

## USER FRIENDLY

We've made it simple - Just plug it in, and pull the LED strip out. The 10m long LED strip makes it possible to have the light surroundings you need and for whatever you are doing.

## TIMESAVING

The Multiflex LED strip is especially developed to save time rigging the lights. Every task require lighting and a simple floodlight is not always suitable for the job.

With Multiflex you do not have to worry about shadows or the need for pointing the light in the right direction. You just have to pull the LED strip out, plug it, and take it with you where you are going.

## A MUST-HAVE IN YOUR TOOLBOX

Packed on a retractable reel, this is the perfect tool to have in your toolbox or on your shelf. Compared to other types of traditional lighting you will save loads of space.

## SAVE STORAGE SPACE AND SHIPPING COSTS

A typical lighting fixture are placed every 5 meter to light up lager areas. They are about the same size as one roll of our LED strip. In this case you would need 2 lighting fixtures to light up the same area as our 10m LED strip. For any project, this will save costs for both shipping, handling and storage.

Product	Article	Lumen (lm)	Watt	Kelvin	IP	LED qty	Voltage
Multiflex	156170	700	80W - 8W/m	4000	65	70/m	220-240V
