- Quick and easy installation
- Plugg & play
- Packed in a practical carrying case
- Easy to handle, safe to use

EXPERIENCE AND DEVELOPMENT

We have worked with lighting for many years. We have learned that technology is constantly changing and that development happens quickly. That is why we are constantly developing our products and services.

LED-head

Choose between 3- or 6-LED heads.

3 heads give 40,000 lumens/300W and 6 heads give 80,000 lumens/600W.

The 360° LED Worklight system is a flexible lighting solution where the LED heads can be positioned up to 360°, with an integrated driver and flicker-free optical LED technology.

The 360° LED Worklight system is waterproof and suitable both indoors and outdoors.

Tripod or magnetic bracket

The LED head is easily mounted on a telescopic tripod or a magnetic bracket.

The tripod has a maximum length of 3 metres, and can be easily folded up and placed in the included carrying bag for next use.

The magnetic bracket can be mounted on a mast, container, door or similar.

User-friendly and simple assembly

The 360° LED Worklight system comes in portable and solid bags. Easy to handle, fast and assemble.

Art.nr	Product
